

PRESS RELEASE

Neu-Ulm, August 2025

On-board kitchens, cool boxes and more from the traditional German manufacturer TM will once again be exhibiting a wide range of on-board kitchen and cool box products at Busworld in Brussels this year. The innovative developers from Bavaria have brought along a number of new products that make life more pleasant for bus operators and their passengers.

Particularly noteworthy are the stagnation flush, which ensures safe drinking water, and the galley with the award-winning Nivona Cube 4 coffee machine for perfect coffee enjoyment.

NEWS

QS MultiPlus 2G with stagnation rinse – New Feature in Onboard-kitchen from TM

Prevents stagnation and contamination of drinking water

All QuickService MultiPlus 2G units now feature a new function: stagnation rinse. Especially in the summer months, prolonged stagnation of water in the galley pipes can have a negative effect on drinking water quality.

Automatic reminder function

Stagnation rinse provides a remedy to prevent unwanted contamination of drinking water. At regular intervals, a reminder to flush the pipes appears on the new control panel. Cleaning can be carried out in just a few steps and ensures that you can enjoy the peace of mind that comes with using safe drinking water.

Stagnation rinse can be added at any time

The stagnation rinse function can be added on request. It can be activated in just a few steps using a code on the new, modernised display in the galley.

QS MultiPlus 2G with Nivona Cube 4

The new way of making coffee on board

This new product will make coffee lovers' hearts beat faster. Anyone looking for new coffee experiences on board a coach will find an excellent solution in the QS MultiPlus 2G with the Nivona Cube 4 coffee machine.

Small. Compact. Powerful.

The multi-award-winning coffee machine from Nivona impresses with its compact dimensions and new aroma technology. The coffee machine combines the idea of a portafilter, fully automatic coffee machine and capsule machine and brews coffee or espresso for connoisseurs with its characteristic click.

Cool boxes not only for buses

It is not only bus operators and manufacturers who rely on compressor coolers in their vehicles. The specialist for coolers in commercial vehicles and buses now offers a wide range of products, among which the occasional motorhome owner (outdoor enthusiast) will also find the product of their choice.

Cool boxes now also solar-powered

New to the range is the further development of the CoolFix30. The tried-and-tested classic among small cool boxes not only impresses with its handy format, but also offers the option of connecting a solar module.

V 18 van cool box now also available for right-hand drive vehicles

In order to serve as many markets as possible, the tried-and-tested V18 van cool box is now also available for right-hand drive vehicles. The design and layout of the cool box have been perfectly adapted to the installation situation. This means that the box can be integrated perfectly into the dashboard of a Mercedes Sprinter, for example.

About TM Technischer Gerätebau

TM Technischer Gerätebau GmbH is one of the world's most successful manufacturers of components for passenger services in road and rail vehicles. Its international presence is underlined by branches in Turkey and China, and it has a Europe-wide network of service partners. The owner-managed company, based in Neu-Ulm, has been in existence since 1933 and is known as a niche manufacturer for innovative and economical solutions. In order to operate sustainably, care is taken during development to ensure that products can be repaired. In addition to classic dashboard coolers, galleys and toilets for the bus industry, TM's product portfolio also includes milk coolers, cup warmers and various combination appliances for the coffee machine sector, which are marketed under the TM Lifestyle brand. www.tmtech.de
